

Appl. No. 09/847,755
Amdt. dated February 9, 2005
Supplement to Amendment filed January 6, 2005

Remarks

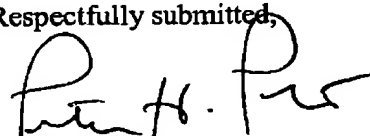

The present amendment corrects oversights noted in the Amendment filed on January 6, 2005. That Amendment included an Amendment to the Specification. Requests to replace paragraphs beginning at page 7, line 9 and page 7, line 17, as well as the accompanying changed paragraphs, were placed such that they immediately followed the request to replace the paragraph beginning at page 9, line 14. This placement resulted in the appearance of a request for a change without any accompanying change, as well as submission of a changed paragraph with no reference or an improper reference. In addition, the request to replace the paragraph beginning at page 9, line 2 should have referred to the paragraph as beginning at page 9, line 3. The present Amendment corrects these oversights. The present Amendment does not include any additional changes as compared to the Amendment filed on January 6, 2005, but includes corrections so that the paragraphs to be changed are properly referred to and the changes to be made properly follow the references to the paragraphs to be changed in the correct order.

Appl. No. 09/847,755
Amdt. dated February 9, 2005
Supplement to Amendment filed January 6, 2005

Conclusion

The combination of this Amendment and the previously filed Amendment correct the Specification and place the claims in order for allowance. Therefore, withdrawal of the rejection stated in the Office Action of September 28, 2004 and prompt allowance are requested.

Respectfully submitted,

Peter H. Priest
